Unreal Engine 4/5

Unity

Microsoft Office

Video Editing

Photoshop

Audacity

RPG Maker

Source Control Software

Passionate gamer, game designer, and Twitch streamer, looking for junior positions in either QA or Game Design. I love every aspect of game design, and frequently hone my skills through personal projects, game jams, and content creation (plus other related activities).

Experience

Twitch **2016 - Present**

Streamer

Regularly stream, create content, and manage social media.

I frequently play current and nostalgic games, interact with my community, collaborate with other streamers and live game design when possible.

Game Tester **Ongoing**

Numerous paid and volunteer testing positions for upcoming titles, mostly under NDA, using multiple platforms. During which the games are played, specific components are tested (if instructed to do so), and detailed feedback is given once the tests are over.

Game Jams

Designer

I participate in every game jam I am capable of doing so, resulting in multiple fast projects over the years. In these I design, test, and fill in as needed to meet the often tight deadlines.

Personal Projects

Currently working on a variety of personal projects, constantly honing in-engine, documentation, and design skills. Purposely have not tied myself to any one style of genre to increase my scope of experience and development skills.

Education

Teesside University **2012**

Psychology & Counselling Bachelor of Science

Teesside University **2021**

Games Design Master of Arts

Volunteering

Lifeline

Volunteer

Did whatever was needed for that day including (but not limited to); manning the needle exchange, aiding in creation of treatment programs, and greeting and signing up clients
